# Himanshu Roonwal

Experienced PHP Developer | Expertise in CodeIgniter, MySQL, and Web Application Development | Driving Scalable Solutions for Government and Private Sectors

New Delhi, Delhi, India

## Summary

Passionate and results-driven PHP Developer with over 6 years of experience in building and optimizing web applications using PHP, CodeIgniter, MySQL, and a suite of front-end technologies (HTML, CSS, JavaScript). Proven ability to manage large-scale government and private sector projects, ensuring scalability and functionality.

Currently working at Ernst & Young, where I develop and manage key government projects like the AMRUT portal. I am skilled at debugging, testing, and optimizing code, with a focus on delivering responsive and stable applications.

Career highlights include:

Managed and optimized large-scale web applications, ensuring high performance and scalability.

Developed and ported multiple websites, including the Michael Electronics portal, contributing to business efficiency.

Looking to leverage my technical expertise and passion for coding in a dynamic environment where I can contribute to impactful projects.

Open to roles that offer challenging problems to solve and the opportunity for growth.

---

## Experience

EY

Ernst & Young, Delhi — PHP Developer

May 2023 - Present (2 years 7 months)

Delhi, India

Leading the development of large-scale web applications using PHP and CodeIgniter.

Working on the AMRUT portal (<https://amrut.mohua.gov.in/>), focusing on code optimization and scalability to support government initiatives, designed to track and manage urban development projects across India. The portal supports central and state governments in monitoring project progress, financial disbursements, and real-time data reporting.

## Web2Ease Private limited

### Software Developer

January 2018 - May 2023 (5 years 5 months)

Jaipur Area, India

PHP Developer for Michael Electronics Portal (<https://portal.michaelelectronics2.com>): Developed robust APIs and automated solutions to manage the integration between the Michael Electronics portal and major e-commerce platforms like Amazon, Walmart, BestBuy, and NewEgg. This ensured a seamless experience for product listings, order processing, and shipping coordination.

PHP Developer for Web2Ease (<http://web2ease.com>): Led the development of the company's core website using PHP. This involved refactoring legacy code, troubleshooting issues, and ensuring seamless content management across the platform.

Technologies Used: PHP, MySQL, JavaScript, HTML, CSS, JQuery

---
